

1st as Pivot element

11/

157

133

122

(141, 147, 149, 151) sorted

122, 117

final sorted array

110, 111, 112, 122, 117, 123, 133, 141, 147, 149, 151

157

last as pivot:-

1. 157, 110, 147, 122, 111, 149, 151, 141, 123, 112, 117, 133

2. 117, 110, 147, 122, 111, 149, 151, 141, 123, 112, 157, 133

3. 117, 110, 112, 122, 111, 149, 151, 141, 123, 147, 157, 133

4. 117, 110, 112, 122, 111, 123, 151, 141, 149, 147, 157, 133

5. 117, 110, 112, 122, 111, 133, 141, 149, 147, 157, 151

117, 110, 112, 122, 111, 123

141, 149, 147, 157, 151

141, 149, 147, 151, 157

6. 117, 110, 112, 122, 111

141, 149, 147

157 (sorted)

7. 110, 112, 122, 111

141, 147, 149 (sorted)

8. 110, 112, 117, 122, 111

final Sorted Array

110, 111, 112, 117, 122, 123, 133, 141, 147, 149, 151, 157

9. 110, 117, 112, 122, 117

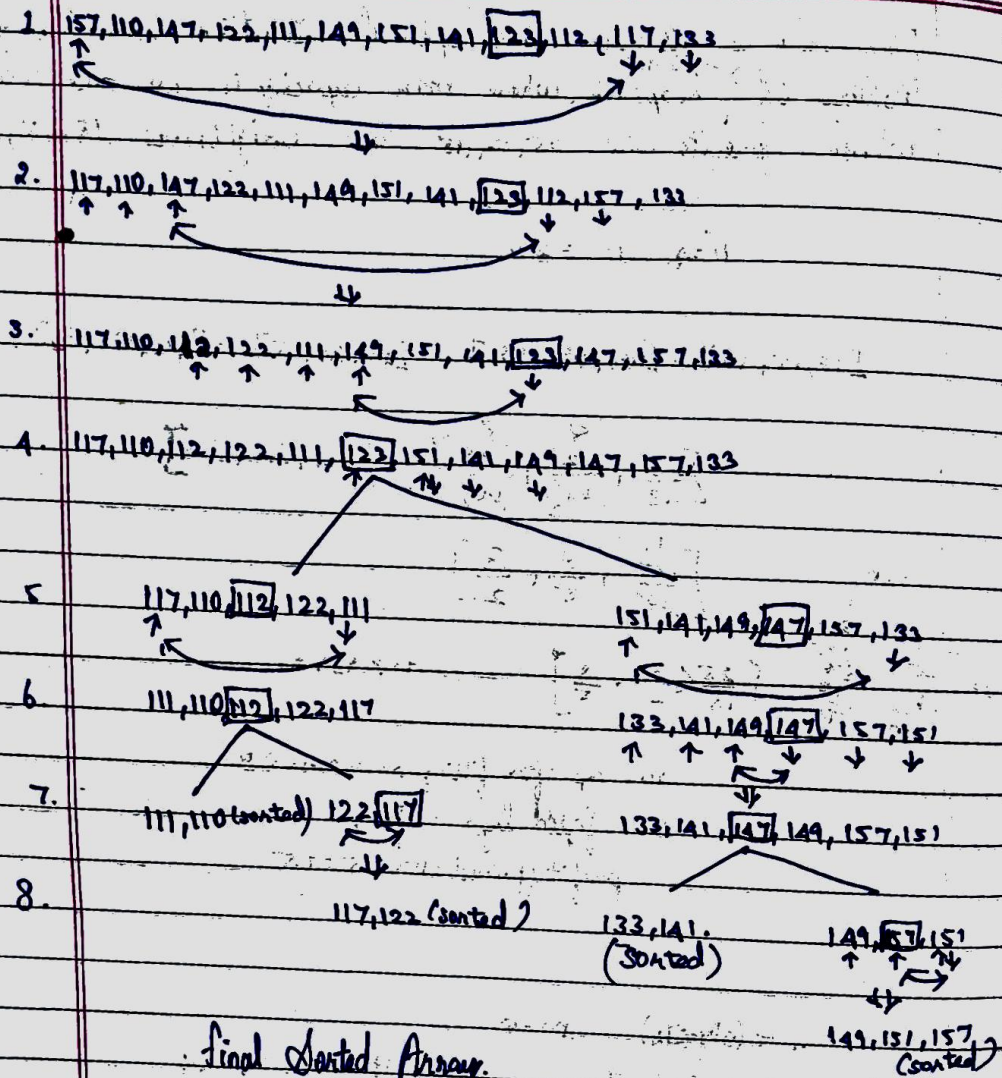

110, 117 (sorted)

122, 117

10.

117, 122

Random Element As Pivot.

Choosing last or 1st element as pivot is not much efficient.
